**Comments:**

The project consists of design and construction of a new wastewater treatment plant to replace the existing wastewater treatment lagoons. The project will involve construction of a complete biological wastewater treatment system with an internal clarifier, new influent pumps, and a new chlorine tank, dechlorination unit and post aeration. The upgrade will increase the Town's wastewater treatment capacity from 0.08 million gallons per day (mgd) to 0.2 mgd. The project is required due to a consent
